Appendix B – Incident Management Team Org Chart

Incident Management Team

The IMT provides the command and control infrastructure that is required to manage the logistical, fiscal, planning, operational, safety, and campus issues related to any and all incidents/emergencies. IMT is comprised of two groups: 1) Emergency Operations Center Team made up of the individuals who would serve as the primary Incident Commanders and Command and General Staff and 2) Field Team made up of those individuals whose response roles are put in the field. An incident’s type and size will dictate whether all or some of the IMT members are activated. All IMT members are working towards a FEMA Type 3 position specific training certification and completion of a position-specific task book. IMT meets monthly to develop plans and to test and exercise those plans.
